AGENCY: Federal Emergency Management Agency; DHS.

ACTION: Final Notice; correction.

SUMMARY: On May 15, 2014, the Federal Emergency Management Agency (FEMA) published in the Federal Register a final flood hazard determination notice that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 79 FR 27892. The table provided here represents the final flood hazard determinations and community affected for Robeson County, North Carolina, and Incorporated Areas.

Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the community listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in FEMA's National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance

agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for the community is available for inspection at the Community Map Repository address listed in the table below and will be available online through the FEMA Map Service Center at www.msc.fema.gov by the effective date indicated above.
